

# Rhapsody - S Interconnect

- **Heavy (4%) Silver-Plated CCT Copper Conductors**

*for detailed, precise musical re-creation*

- **Super-Foamed Polypropylene**

*low loss dielectric for excellent signal control*

- **Foam Polypropylene Tape**

*mechanical and electrical insulation*

- **Copper Foil Shield**

*for high-frequency EMI rejection*

- **Fiber Braid**

*controlled airspace filler to minimize microphonics*

- **Clear PVC Jacket**

*durable, cosmetically appealing*

**NEW**

Rhapsody-S Interconnect incorporates the Helix CCT (Compressed Conductor Technology) utilized in Serenade and Crescendo. It offers a holographic soundstage coupled with the speed and transparency of Silver. Mid and low frequencies are presented with remarkable balance and control. Rhapsody-S Interconnect can be terminated in standard or balanced format to satisfy the requirements of discerning audio enthusiasts.
